STIFFENER
Steel Structures

stiffenersteel.com

Who
are we

We are a steel construction company with over 10 years of experience in engineering, fabrication, and installation. Our team provides end-to-end solutions for commercial, industrial, and residential steel projects, emphasizing safety, durability, and cost-efficiency.

STIFFENER
Steel Structures

stiffenersteel.com

Vision

To become a leading global provider of innovative and sustainable steel structures.

Mission

To deliver value-driven steel solutions through engineering expertise, reliability, and a client-first approach.

Our Core Values

Integrity

We act honestly
and ethically

Sustainability

We build
responsibly

Customer Commitment

We prioritize client
satisfaction

Teamwork

We collaborate for
better outcomes

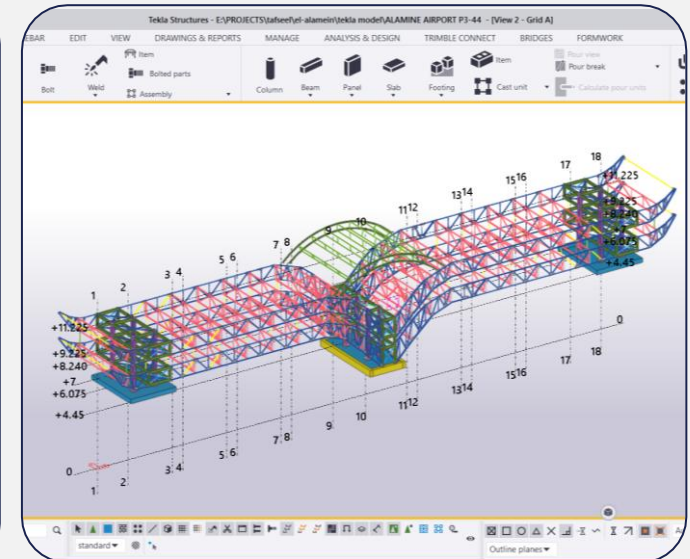

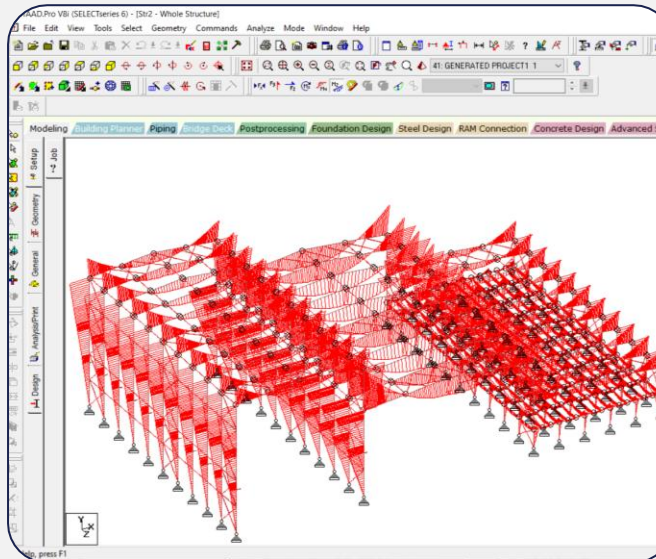

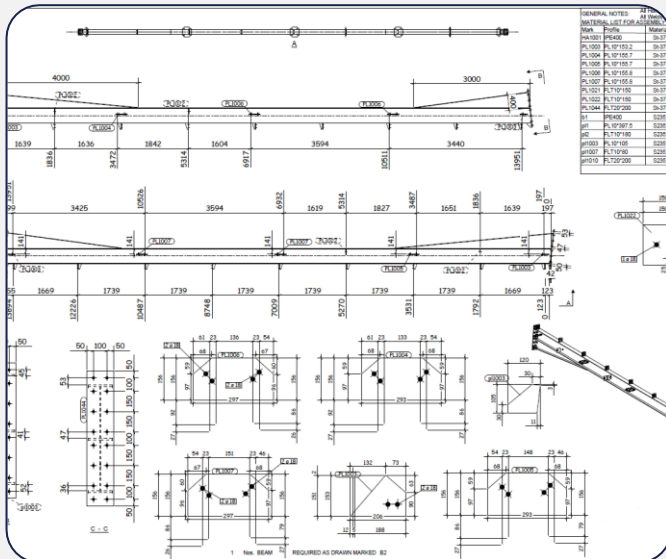

Excellence

We strive for high
performance

We provide design and technical consulting services to ensure each steel structure is safe, cost-effective, and easy to fabricate and assemble:

- **Structural design**
Engineering calculations and detailed layouts.
- **Shop drawings**
Optimized for manufacturing and installation.
- **Technical studies**
Feasibility, budgeting, and value engineering.

Execution Services

We manage the complete fabrication and installation process to ensure efficient project delivery:

Fabrication

Cutting, welding, and assembling steel components in our facility.

Finishing

Painting, cladding, or galvanizing as per client needs.

Installation

Erection on site with cranes and tools.

Safety & project management

We follow industry best practices.

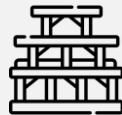

Types of Projects We Deliver

We specialize in diverse steel structures tailored to client needs

Steel Sheds & PEB Buildings

Economical, fast-build structures.

Multi-story Structures

Offices, dormitories, modular buildings.

Warehouses & Hangars

Wide span buildings with open interiors.

Commercial & Industrial

Custom solutions for complex operations.

Manufacturing Capabilities

Our factory is equipped to produce high-quality steel components

Factory area

1000 sqm with
overhead
cranes

Equipment

CNC cutting,
welding
machines

Output capacity

400
tons/month

Workers

Skilled workers
and
supervisors

Quality Standards

We apply strict quality controls and aim for international certifications

01 | Material traceability and testing

02 | ISO or local standards followed

03 | Inspection at every stage: raw materials, welding, painting

05 | Safety and compliance first

04 | Final delivery inspection with client approval
